# History

- 1991, Sun, Naughton and Gosling, "Green" project.
  - They designed a programming language for consumer devices like cable TV switchboxes.
  - They designed a virtual machine to make the language not be tied to any single architecture.
  - The new programming language and virtual machine are implemented in C++.
- 1995, SunWorld, HotJava browser.
  - HotJava browser can execute code inside web pages!
- 1996, Java 1.0 and Java 1.1
- 1998, JavaOne, Java 1.2
- 2000, Java 1.3
- 2002, Java 1.4, regular expression

# History 2

- 2004, Java 5.0, generic types, "for each" loop and ...
- 2006, Java 6, JDBC, Scripting Language support, new GC
- 2011, Java 7, JVM support for dynamic languages
- 2014, Java 8, lambda expression, Win XP is not officially supported

#### Current

- Large-scale systems: ERP, EMR, EHR and ...
- Cross-platform applications: Web, PC, Mobile ...
- Big data systems: Hadoop, Spark, Storm
- JVM languages: Cloure, Scala http://en.wikipedia.org/wiki/List\_of\_JVM\_languages

### Websites

#### Websites

- java.com for user
- http://www.oracle.com/technetwork/java/index.html
- jcp.org
- TheServerSide.com
- ITEye.com (in Chinese)
- importnew.com (in Chinese)

## **Books**

#### **Books**

- Core Java, 8th Edition Java核心技术
- Thinking in Java, 4th Edition Java编程思想
- Effective Java

- Introduction to JAVA
- Quick Get Started
  - Hello Java
  - JRE and JDK
  - Integrated Develop Environment
  - Building and Integrating System
- Java Basic

- Introduction to JAVA
  - Overview
  - History
  - References
- Quick Get Started
  - Hello Java
  - JRE and JDK
  - Integrated Develop Environment
  - Building and Integrating System
- Java Basic

```
public class HelloJava{
    public static void main(String[] args) {
        System.out.println("Hello Java!");
    }
}
```

\$javac HelloJava.java
\$java HelloJava

Hello Java!

- Introduction to JAVA
  - Overview
  - History
  - References
- Quick Get Started
  - Hello Java
  - JRE and JDK
  - Integrated Develop Environment
  - Building and Integrating System
- Java Basic

# How to Run Java programs?

You need Java Runtime Environment! java.com

# How to Develop Java programs?

You need Java Development Kit!

### **Installation of JDK**

#### Installation

- JDK 8 or JDK 7?
- http://www.oracle.com/us/downloads/index.html
- Java SE 8u25 or Java SE 7u71

- Introduction to JAVA
  - Overview
  - History
  - References
- Quick Get Started
  - Hello Java
  - JRE and JDK
  - Integrated Develop Environment
  - Building and Integrating System
- Java Basic

JAVA: Object Oriented Programming
Quick Get Started
Integrated Develop Environment

# Eclipse

www.eclipse.org

# Hello Java in Eclipse

- Start Eclipse
- File New Java Project
- File New Class
- Input codes
- Run

## **NetBeans**

https://netbeans.org/

### Hello Java in NetBeans

- Start Netbeans
- File New Project
- Input codes
- Run Project

- Introduction to JAVA
  - Overview
  - History
  - References
- Quick Get Started
  - Hello Java
  - JRE and JDK
  - Integrated Develop Environment
  - Building and Integrating System
- Java Basic

### Ant

Apache Ant is a Java library and command-line tool whose mission is to drive processes described in build files as targets and extension points dependent upon each other.

Ant is a kind of make for Java.

### HelloJava with Ant

see HelloJava directory. https://ant.apache.org/manual/ tutorial-HelloWorldWithAnt.html

#### Maven

Apache Maven is a software project management and comprehension tool. Based on the concept of a project object model (POM), Maven can manage a project's build, reporting and documentation from a central piece of information.
